

my name is george c mullins my amateur call sign is KC8QWW i support this
petition RM-10870 are the mississippi amateurs respond to the amtrak train
accident are they sending out morse code to get emergency help to the injured
people or will they use the fast way which would be use there mikes on hf bands
and vhf and uhf morse code is the slow way to get emergency help and morse code
is out dated because nobody would want to use it when it comes peoples lives in
danger i hope that the FCC drops the morse code test from all the hf bands
because it is a slow way to get help in and emergency what if a person life was
in danger and he was sending out morse code and the station that was copy the
signal but he dont know morse code i think we should move forward into the
future and do away with morse code all together my prayers go out to the people
that got hurt in the train accident and i am glad that the amateurs got them
help as quick as they could and not by morse code if a old ham wants to use
morse code to talk to his friends then let him but dont make new hams have to
learn it before they can get on hf bands thank you
